

# Anurag Gupta

## Full Stack Developer

Full-stack engineer specializing in React.js, React Native, and Next.js with deep experience in building scalable products end-to-end. I design and deploy complete systems using Node.js, MongoDB, Docker, and AWS (EC2, S3, SES, SQS, Lambda), including mobile app delivery to the Play Store. Proven ability to lead teams, architect cloud solutions, and deliver production-ready applications with speed and reliability.

anuraggupta14821@gmail.com

### Address

Mumbai, Jogeshwari West

## TECHNICAL SKILLS

- NEXTJS
- React.js (Advanced)
- React Native (Production Apps)
- TypeScript
- Redux Toolkit / Zustand
- Tailwind CSS
- Node.js & Express.js
- REST APIs & Microservices
- MongoDB
- Firebase Authentication
- AWS EC2, S3, SES, SQS, Lambda, CloudWatch, IAM
- Docker & Containerization

## Experience

○ **04/2026 - Present**  **Andheri East, Mumbai**  
DCC GROUP

### Sr. Software Engineer

Leading a cross-functional engineering team responsible for building scalable enterprise applications, AI-powered automation solutions, and cloud-based industrial platforms. Managing frontend, backend, AI, deployment, and infrastructure while collaborating with stakeholders to deliver production-ready systems.

#### Key Contributions:

1. Architected and developed an enterprise **Service CRM** and **Field Service Management (FSM)** platform for service operations, technician scheduling, and workflow automation.
2. Built **AI Agents, Voice Calling Bots**, and business automation solutions using LLMs to streamline customer support and internal processes.
3. Developed the **Smart Cloud IoT Platform** for real-time machine health monitoring, asset tracking, telemetry, alerts, and predictive maintenance.
4. Designed scalable REST APIs and backend services using **Node.js, Express.js, CodeIgniter, RabbitMQ, PostgreSQL, and SQL Server**.
5. Built responsive web applications with Next.js, React.js, TypeScript, and Tailwind CSS following modern architecture and best practices.

○ **02/2025 - 03/2026**  **Khar West, Mumbai**  
Workverse

### Technology Architect

Workverse is a product-based gaming company focused on simulation-based soft skills training. I architected and developed multiple large-scale products, including the Workverse Gaming Platform and the Nimaya LMS ecosystem.

#### Key Contributions:

1. Architected and built the complete backend for a simulation-based soft skills training game using Node.js, Express.js, MongoDB.
2. Developed core modules including assessments, scoring engine, badge rewards, analytics tracking, and automated certificate generation.
3. Deployed and scaled systems on AWS EC2, S3, SES, SQS, Lambda, CloudWatch, IAM, Route53, ensuring high uptime and reliable performance.
4. Containerized microservices with Docker, configured Nginx, and set up automated CI/CD pipelines with GitHub Actions.
5. Led the end-to-end development of the Nimaya LMS Product, including a React Native learner app and a Next.js multi-role admin panel for scheduling, attendance, assessments, content delivery, certifications, compliance, and real-time notifications.

# KEY PROJECTS

## NIMAYA LMS

- React Native
- Next.js
- AWS
- Redis

Full-scale LMS with Mobile app & admin dashboard

<https://nimaya.in>

## WORKVERSE GAME

- Node.js
- MongoDB
- AWS

Simulation-based soft skills gaming platform

<https://dashboard.workverse.in>

## SAMANYA GYAN

- Next.js
- Node.js
- MongoDB
- Redis

Online LMS for quizzes & assessments

<https://samanyagyanedu.in>

## 24x7 Services Centers

- Next.js
- Node.js
- MongoDB
- AWS
- Redis

Online Service booking platform for home appliance repair operations.

04/2024 - 01/2025  Bhayandar, Mumbai  
MCANSEY IT Services & Consulting Pvt Ltd

### Full Stack Developer

MCANSEY is a service-based technology firm delivering full-stack solutions for Indian and international clients. I worked on multiple production-grade web platforms, handling both frontend and backend development along with deployments.

#### Key Contributions:

1. Developed end-to-end web applications using Next.js, React.js, Node.js, Express.js, and MongoDB.
2. Built and delivered live production projects including NewzCover, The Flique, Varcas Batteries, and 24x7 Service Center platforms.
3. Designed responsive and optimized UIs with React and Tailwind CSS, improving usability across desktop and mobile devices.
4. Implemented backend APIs for data management, authentication, and business workflows.
5. Handled cloud storage and media management using AWS S3, Cloudinary, and MongoDB Atlas.
6. Deployed applications on VPS and AWS, ensuring secure configurations and stable production environments.
7. Worked with Docker and CI/CD workflows to streamline deployments and reduce manual release effort.

06/2023 - 03/2024  Malad, Mumbai  
A H Satija & Co

### Full Stack Developer

1. Built and maintained a production-grade business application using React, TypeScript, Redux, Node.js, and MongoDB.
2. Designed and implemented REST APIs, frontend logic, and state management within a MERN-based architecture.
3. Worked on core features including user flows, data handling, validations, and role-based UI behavior.
4. Optimized frontend performance and improved application usability through reusable components.
5. Actively participated in code reviews, debugging, and feature delivery, contributing to stable production releases.

03/2023 - 05/2023  Goregaon, Mumbai  
APML

### Front End Developer

1. Developed dynamic UI components and dashboards using React.js.
2. Built data-driven tables and admin dashboards for internal operations.
3. Integrated frontend components with backend APIs and MongoDB data.
4. Focused on performance optimization, usability, and clean component architecture.

# EDUCATION

## BSC Computer Science

Thakur College CGPA 9 / 11

06/2021 - 04/2024

Mumbai

## HSC Science

Valia College

06/2020 - 04/2021

Mumbai

## SSC (English Medium)

SMT R.M.V. Percentage 68 %

06/2018 - 04/2019

Mumbai
